Summary
John Day residents from 1 neighborhood have experienced indoor and outdoor odor and health symptoms since February.→ A consultant was hired to investigate and a summary report is at → [
http://www.cityofjohnday.com/LinkClick.aspx?fileticket=g_CkU2DqNio%3d&tabid=5080&mid=10533&language=en-US]
http://www.cityofjohnday.com/LinkClick.aspx?fileticket=g_CkU2DqNio%3d&tabid=5080&mid=10533&language=en-US].→ The incident was reported to the Oregon

Emergency Response System for cross agency coordination.→ Early reports suggest benzene.

→

Assessment

EPA is the lead agency investigating an unpleasant odor with associated health symptoms in John Day. → The EPA team will be performing a door-to door survey of households and businesses in the area over the weekend.→

→

Surveillance

OPHD is monitoring emergency department visits and has offered support to EPA investigation.→ Oregon DEQ is integral to response.

→

Communications

→→→→→→→→ EPA will update their website on the response as information becomes available [<http://www.epaosc.org/johnday>]<http://www.epaosc.org/johnday>.

→→→→→→→→ EPA is developing FAQ and listing EPA and LHD contacts for consumer questions.

→→→→→→→→ EPA will share talking points and OPHD will identify a spokesperson as more information about odors becomes available.
